

## The new Snake Wave curtain track system by Silent Gliss

### Curves in all the right places...

The innovative Snake Wave curtain track system by Silent Gliss is sure to lend fresh vitality to any interior decor. In keeping with its name, the system moves curtains, screens or room divider smoothly, silently and elegantly along its tracks. Such a unique design will undoubtedly create an atmosphere of exclusivity and style.

The system is designed around even, precise curves applied throughout the length of the track. Silent Gliss has over sixty years of experience bending curtain tracks; it is the only manufacturer in the world with the technical expertise and experience to achieve this level of precise and consistent bends.

Snake Wave can be used with the Silent Gliss hand-operated curtain track systems 1060 and 6465 and when combined with traditional Swiss premium sewing techniques creates a true design highlight.

Silent Gliss won with Snake Wave at the Iconic Awards 2016 in the category „Products“ the award „Best of Best“. We were elected first prize for our innovative system by the “German Design Council”, an independent jury.
